

Razny Razeek

Full-Stack Engineer | .NET, React, SQL Server

mraznyrazeek@gmail.com | linkedin.com/in/raznyrazeek

Professional Summary

Full-Stack Software Engineer with 04 years of commercial experience building scalable web and data-driven applications using .NET, ASP.NET Core, React, Angular, and SQL Server. Strong background in REST API development, database optimization, ETL pipelines, reporting automation, Azure services, and CI/CD delivery. Passionate about building clean, maintainable, production-ready software using SOLID principles and modern engineering practices.

Key Achievements

- Reduced manual reporting workload by 70% by automating enterprise reporting using SSRS and SQL Server Agent
- Improved database performance by up to 50% through query optimization, indexing, and schema tuning
- Built ETL pipelines that reduced data latency by 60% across large-scale JSON, XML, and CSV datasets
- Improved frontend performance, reducing page load times by 20%
- Designed and implemented scalable REST APIs used across internal and third-party systems

Technical Skills

- **Backend:** C#, .NET Core, ASP.NET Core, ASP.NET MVC, RESTful APIs, Entity Framework Core, LINQ
- **Frontend:** JavaScript (ES6+), TypeScript, React, Angular, Tailwind CSS
- **Databases:** SQL Server, MySQL, PostgreSQL, MongoDB
- **Data & Integration:** SSIS, SSRS, ETL Pipelines, SQL Server Agent, JSON, XML, CSV Processing
- **Cloud & DevOps:** Microsoft Azure (Azure Functions, Azure SQL), Docker, Git (GitHub), GitHub Actions, CI/CD Pipelines
- **Architecture & Practices:** Clean Architecture, SOLID Principles, Microservices, REST API Design, Unit Testing

Professional Experience

Full-Stack Developer

Spicehaart – Colchester, UK | Sept 2024 – May 2026

- Built scalable .NET Core REST APIs, Windows Services, and microservices for business-critical platforms and third-party integrations
- Developed commercial web applications using React, Angular, and Next.js, improving responsiveness and user experience
- Developed and optimized T-SQL queries, stored procedures, functions, and indexes, improving database performance by up to 50%
- Built SSIS ETL pipelines to process large-scale JSON, XML, and CSV data into centralized systems
- Created and enhanced SSRS reports for financial, marketing, and operational insights, including commission-based reporting, and automated reporting workflows using SSRS and SQL Server Agent
- Implemented GitHub Actions CI/CD pipelines and supported Azure deployments
- Managed IIS deployments using deployment packages, application pools, site bindings, and Remote Desktop
- Collaborated with product managers, QA, and designers in Agile/Scrum teams to deliver production-ready features

Full Stack Developer (Freelance)

Self-Employed – Bristol, UK (Remote) | Apr 2024 – Sept 2024

- Developed RESTful APIs and secured web integrations using JWT authentication
- Built frontend features using React, Blazor, and ASP.NET Core to support business requirements
- Took ownership of existing full-stack codebases, debugging .NET Core and frontend issues, refactoring code flows, and improving maintainability using clean architecture principles
- Built and optimized MySQL queries and indexes, improving database performance by 25%
- Wrote unit and integration tests to improve system reliability

Software Developer

24K Tech Solutions – Sri Lanka | Jul 2021 – Nov 2022

- Developed and maintained applications using C#, ASP.NET Core, ASP.NET MVC, WebForms, Razor Pages, WinForms, .NET Framework, and .NET Core
- Built responsive frontend features using Angular, JavaScript, Bootstrap, Tailwind CSS, HTML, and CSS
- Designed database schemas, queries, stored procedures, and indexes across SQL Server, MySQL, and SQLite
- Processed, transformed, and integrated XML data using XSLT and XPath within enterprise applications
- Built reusable backend modules and application components following SOLID principles to support scalable development
- Maintained multiple e-commerce platforms, delivering new features, bug fixes, and production-ready pages
- Built full-stack IIS deployments for ASP.NET/.NET Core backends and frontend builds

Projects

LesiBuy (E-Commerce Platform) – ASP.NET Core, EF Core, Angular, SQL Server

- Built a full-stack e-commerce platform with product management, filtering, and secure REST APIs
- Implemented authentication and optimized data handling to improve performance and user experience

Product Search & Catalog Platform – .NET, React, PostgreSQL, Elasticsearch

- Built a full-stack system to ingest and clean bulk external product data into a structured relational model
- Optimized product search using Elasticsearch with filtering and real-time synchronization from the database

Global Bitcoin Sentiment & Volatility Modelling – Python, scikit-learn, NLTK, BERT, Pandas, NumPy

- Analysed 500K–750K global Bitcoin-related records from authorised sources and GDELT using NLP techniques (lexicon, vector-based, ML)
- Developed and tuned ML models (SVM, Random Forest, Gradient Boosting, BERT) for sentiment classification and trend analysis
- Built time-series forecasting models to examine sentiment impact on Bitcoin price and volatility (pre- and post-pandemic)

Education

MSc Data Science

University of the West of England, Bristol, UK | Jan 2023 – Mar 2024

BEng (Hons) Software Engineering

London Metropolitan University, London, UK | Sep 2018 – Nov 2021

Certifications

- Microsoft Certified: Azure Fundamentals (AZ-900)
- Version Control & CI/CD DevOps
